

Hot tub

Introduction:

The Hot tub accommodates up to 4 people. There are no chemicals added and the water is changed for each guest stay or after 7 days if the guests are staying longer. The water is sourced from the aquifer which runs under our property

We only use wood from our property to heat the water. I

It is important to put the lid of the Hot Tub back after you have finished. This keeps the water at the same temperature for 2 – 3 days.

Heating the water:

Peter or Rebecca will do this. For reasons to do with safety and potential fire hazards as well as the possibility of guests burning themselves on the hot metal firebox, we ask that you do not add fuel yourself or try to adjust the fire box.

Besides the fact that we want our guests to stay safe - we have a lot of treasured and rare trees around our property and we really want to avoid a fire at all costs.

Recommended temperature

The water is heated to 39 degrees.

A hose with cold water is connected to a tap beside the Retreat approximately five metres from the Hot Tub. Use this to cool the water if it is too hot for you.

Towels

The towels provided for the Hot Tub are provided on hooks beside the Hot Tub. Please do not use the towels from the Retreat Bathroom

Drinks and Glassware

Take care if you are drinking wine or other beverages in glassware. We have provided a stool with a non -slip top as a safe place to sit your drinks and minimize the chances of the glassware being knocked over and smashed. Accidents happen- If there is broken glass to deal with then the most important thing is that you do not get injured.

Please exit the Hot Tub and the surrounding deck carefully. Please txt us on Mobile : **0213 93 970** and we will clean up the glass for you.
